

Anurag Nitinkumar Ask

Full Stack Developer | RPA Automation Engineer

✉ anuragaski03@gmail.com ☎ +91 78159 57878 in anurag-aski 🌐 AnuragA01

PROFILE

Full Stack Developer with hands-on experience building and deploying web applications using React.js, Node.js, and MySQL. Developed a live LMS platform serving 828 students and completed an internship focused on RPA automation and real business workflow design. Strong foundation in full stack development, database management, and cloud deployment.

TECHNICAL SKILLS

- **Programming:** Python, Java, JavaScript, C
- **Web Development:** React.js, JavaScript, HTML, CSS
- **Databases:** MySQL
- **Core Concepts:** OOP, DBMS, OS, Data Structures
- **Tools:** Git, GitHub, Docker, VS Code
- **Automation:** NeuralFlow, NeuralAgentix (RPA), UiPath

INTERNSHIP EXPERIENCE

Intern Developer | NeuralStream Automations LLP

Jan 2026 – Jun 2026

- Automated placement cell notifications – filters students by company cutoff score from Excel and sends emails only to eligible candidates, replacing full manual process.
- Developed RPA workflows for attendance, inventory, and Pipedrive CRM tasks; added input validation so the bots handle bad data without breaking.
- Used NeuralStream AgentiX to build smarter bots that make decisions based on data, not just fixed rules.
- Took each workflow from requirement to tested delivery – wrote it, broke it, fixed it, shipped it.

PROJECTS

Academic ERP System (Final Year Project) — React.js, Node.js, MS SQL Server, Docker, AWS EC2

- Live production system – 828 students and 23 staff use it daily for admissions, attendance, class allocation, and parent communication.
- Built JWT auth with role-based access, designed the full database schema, and deployed on AWS EC2 with Docker and Nginx for SSL.
- Built real-time attendance tracking and automated report generation, reducing manual admin work significantly.
- Designed and built end to end as a team of two with no existing codebase – from database schema and REST APIs to React frontend and full cloud deployment on AWS.

Health Guidance System — React.js, Node.js, MySQL

- Calculates BMI, classifies the result, and gives personalised diet and exercise recommendations based on user profile.
- Secured with JWT authentication, protected routes, and server-side validation – no unauthenticated access allowed.
- Built a clean React UI where users navigate between BMI, diet, and exercise sections without page reloads.

EDUCATION

D.K.T.E Textile and Engineering Institute, Ichalkaranji

2021 – 2026

B.Tech in Computer Science and Engineering

CGPA: 6.54/10

Banajawada Res PU College, Athani

2019 – 2021

XII (Science)

81.33%

Jadhawagi Edn Society English Medium High School, Athani

2019

X (SSLC), Karnataka Board

76.80%

CERTIFICATIONS

- AWS Cloud Foundations – EduSkills (Amazon Web Services)
- Advanced Prompt Engineering – August 2026
- Introduction to Generative AI – IBM SkillsBuild, May 2026
