# Anurag Nitinkumar Aski

Full Stack Developer | Software Developer

anuragaski03@gmail.com +91 78159 57878 anurag-aski AnuragA01

## PROFILE

Full Stack Developer with hands-on experience building and deploying web applications and automation solutions. Experienced in React.js, Node.js, MySQL, REST APIs, JWT authentication, RPA, and AWS deployment. Strong foundation in software development, database management, and problem-solving.

## TECHNICAL SKILLS

- **Programming:** Python, Java, JavaScript, C
- **Web Development:** React.js, JavaScript, HTML, CSS
- **Databases:** MySQL, MS SQL Server
- **Core Concepts:** OOP, DBMS, OS, Data Structures
- **Tools:** Git, GitHub, Docker, VS Code
- **Automation:** NeuralFlow, Neural AgentiX (RPA), UiPath

## INTERNSHIP EXPERIENCE

**Intern Developer** | NeuralStream Automations LLP Jan 2026 – Jun 2026

- Automated placement cell notifications by filtering students based on company cutoff scores from Excel and sending emails only to eligible candidates, replacing a fully manual process.
- Developed RPA workflows for attendance, inventory, and Pipedrive CRM tasks with input validation and exception handling to ensure reliable automation.
- Used NeuralStream AgentiX to build intelligent automation workflows that make data-driven decisions based on input data and business rules.
- Handled complete workflow development from requirement analysis and implementation to testing, debugging, and deployment.

## PROJECTS

**Academic ERP System (Final Year Project)** — React.js, Node.js, MS SQL Server, Docker, AWS EC2

- Live production system used by 828 students and 23 staff for admissions, attendance, class allocation, and parent communication.
- Built JWT authentication with role-based access control, designed the database schema, and deployed the application on AWS EC2 using Docker and Nginx with SSL.
- Developed real-time attendance tracking and automated report generation, reducing manual administrative work.
- Designed and developed the system end-to-end as a team of two, covering database design, REST APIs, React frontend, and cloud deployment.

**Health Guidance System** — React.js, Node.js, MySQL

- Developed a web application that calculates BMI, classifies results, and provides personalized diet and exercise recommendations based on user profiles.
- Implemented JWT authentication, protected routes, and server-side validation to prevent unauthenticated access.
- Built a responsive React interface allowing users to navigate between BMI, diet, and exercise modules without page reloads.

## EDUCATION

**D.K.T.E. Society's Textile and Engineering Institute, Ichalkaranji** 2021 – 2026
B.Tech in Computer Science and Engineering CGPA: 6.54/10

**Banajawada Res PU College, Athani** 2019 – 2021
XII (Science) 81.33%

**Jadhawagi Edn Society English Medium High School, Athani** 2019
X (SSLC), Karnataka Board 76.80%

## CERTIFICATIONS & ACHIEVEMENTS

- AWS Cloud Foundations – EduSkills (Amazon Web Services)
- Advanced Prompt Engineering – August 2026
- Introduction to Generative AI – IBM SkillsBuild, May 2026
- Solved **150+ problems on LeetCode** across Data Structures and Algorithms, strengthening competitive programming and problem-solving skills.
